

What we've always done

How we've changed since COVID

Autoclave / Sterilize all reusable instruments

Disposable / single use instruments where possible

Disinfecting and Sanitizing all surfaces between patients, including chairs, handles, counters and drawers

Monitoring and testing effectiveness of all our equipment. Including our water and hose lines

Sterisil G5 water treatment system

Additional cleaning to front desk and patient waiting area

UV lights run throughout the office

Disinfection of patient contact areas between every patient

Protective eyewear for all clinical staff

Minimum level 1 fluid resistant mask per patient

Long sleeve fluid resistant lab coat and pants

Gloves

In addition to all previous:

All office wearing basic PPE and shielded eye wear

KN95 masks and Hair coverings for clinical staff

Shield worn during all procedures

Lab coats changed between each aerosol procedure /patient

Centralized HVAC

Altered procedure protocols to reduce aerosols

Chairside ADS EOS System in each operatory

Air Scrubber in HVAC

Supplemental Dehumidifiers

Supplemental HEPA and OSO PURE Air Scrubber filtration units throughout office

We are proud to acknowledge our office as fully compliant with all State of Iowa and CDC mandates
